

An Exélia Art connects instantly to TV, phone and stereo – wirelessly

Watching television, having a conversation on the phone, listening to the stereo at home: all this becomes a pleasure with our easy-to-use FM options and digital wireless accessories. Exélia Art can connect to a world of communication choices via bluetooth – phone, TV, FM, MP3 and more. For more details please consult your hearing healthcare professional or the brochure "A Phonak hears more: benefits and possibilities for you."

Life is on

We are sensitive to the needs of everyone who depends on our knowledge, ideas and care. And by creatively challenging the limits of technology, we develop innovations that help people hear, understand and experience more of life's rich soundscapes.

Interact freely. Communicate with confidence.
Live without limit. Life is on.

PHONAK life is on

An Exélia Art likes to lead

This new Premium product family raises the benchmark for hearing instruments. Exélia Art can offer an ideal solution for almost any degree of hearing loss; it can be personalized and tuned to fit your personal needs. You can enjoy all the latest benefits of the superior Phonak CORE technology, undisputedly the most sophisticated audio processor in the industry. Please read on if you want to add on to your quality of life by choosing the very best in audibility, performance, ease-of-hearing, durability, design, and easy wireless connectivity.

An Exélia Art has the shape you want

Here are some examples from the wide selection of available models; ranging from tiny custom models to powerful Behind-the-Ear models.

An Exélia Art is ready to impress you

Imagine some of the hearing situations that you find challenging, and then picture that an Exélia Art will make you feel at ease in these situations. It will give you the discreet performance you need for the varied situations of life. Here are some of the benefits you can expect to enjoy if you decide that only the best is good enough.

SoundRecover

You can easily follow conversations, understand female voices, hear children's laughter or notice a timer buzzing; not to mention birdsong, leaves rustling in the wind and high notes in music.

DuoPhone

With Exélia Art you will hear a voice on the phone in both ears as soon as you hold the handset to your ear. This makes conversations much easier. At the same time background noise is reduced and clarity improved.

SoundFlow

Transitions between hearing situations become natural again. The sophisticated automatic program management instantly and seamlessly creates an ideal hearing experience for every situation.

WhistleBlock Technology

When you hug a loved one, use a helmet, wear a hat or take a hearty bite out of an apple there will be no whistling; this irritating effect is now history.

ZoomControl with DirectTouch

Now you can enjoy a conversation even if it is inconvenient to face the speaker, e.g. in a car. You can literally zoom in on the speaker, to the back, left and right.

There are many different colors available, so it is up to you to choose a vibrant color, or rather something more discreet.
